SUMMARY

Final-year B.Tech Computer Engineering student (2027) building full-stack apps with TypeScript, Node.js, React, PostgreSQL and MongoDB. Shipped two deployed projects, including an AWS-hosted platform with CI/CD and Gemini API integration. Seeking a Full-Stack / SDE internship.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Java, SQL
Backend:	Node.js, Express.js, REST APIs, JWT Authentication
Frontend:	React.js, Next.js, Tailwind CSS
Databases:	PostgreSQL, MongoDB, Redis
Cloud & DevOps:	Docker, GitHub Actions (CI/CD), AWS (EC2, ECR, ECS, RDS), Git, Linux
Testing/Tools:	Jest, Postman
AI / LLM:	Gemini API, Vector Embeddings, Semantic Search, Prompt Design

PROJECTS

Researcher Campus *Jul 2026 – Aug 2026*

Web platform that checks whether a research idea is novel and drafts a compliant proposal through a 7-step workflow.

Stack: *Node.js, TypeScript, React, Express, MongoDB, PostgreSQL, Docker, AWS, GitHub Actions, Gemini API*
Live: Demo | Code: GitHub

- Automated literature novelty checking across **5 academic APIs** by ranking papers with **768-dim embedding similarity** (TF-IDF fallback), cutting a multi-step manual search into one workflow.
- Designed **31 REST endpoints** (TypeScript/Express, JWT, AES-256-GCM) that sustained **~7,000 req/s with 0 errors** in load tests, backed by **21 automated tests**.
- Kept proposal generation reliable by building a **5-tier Gemini fallback chain** and a **4-check validator** (citations, anonymity, formatting, tone).
- Deployed on AWS ECS Fargate with Docker, GitHub Actions CI/CD and an RDS (PostgreSQL) audit log.

VaultX *Jan 2026 – Mar 2026*

Password manager (web app + Chrome extension) that encrypts data in the browser, so the server never sees your passwords.

Stack: *Node.js, TypeScript, Express, PostgreSQL, React, Tailwind CSS, Chrome Manifest V3, Vercel*
Live: Demo | Code: GitHub

- Built a React frontend and Chrome Manifest V3 extension with autofill, multi-step login capture on SPAs, and 5-format CSV import.
- Ensured the server never sees plaintext by encrypting client-side (**AES-256-GCM, PBKDF2 with 600K iterations**) in a web app and Chrome MV3 extension.
- Mitigated stolen-token replay with refresh-token rotation and reuse detection across a 33-endpoint API.
- Added TOTP 2FA, breach checks and share links; **37 unit tests, 100% coverage** on core modules.

OPEN SOURCE

Elite Coders Winter of Code (ECWoC '26), Contributor | Certificate *Jan 2026*

- Sehat Saathi Guide: Redesigned auth UI (+213/−35) and fixed a Vite favicon path; 2 PRs merged.
- The Dev Pocket: Improved navbar/hero accessibility and responsiveness; PR merged.

EDUCATION

Bachelor of Technology in Computer Engineering, Marwadi University *2023 – March 2027*
CGPA: 8.33 | No backlogs

CERTIFICATIONS

AWS Academy Graduate — Cloud Foundations | Certificate
DevOps Fundamentals — Infosys Springboard | Certificate
