ABOUT

Final-year B.Tech Computer Engineering student specializing in full-stack web development across the MERN/PERN stack — building responsive React.js/Next.js frontends and scalable Node.js/Express backends with secure API design and database architecture. Currently developing VaultX, a zero-knowledge encrypted identity vault, and HookBin, a real-time webhook inspection and debugging platform.

PROJECTS

VaultX – Privacy-first, zero-knowledge encrypted identity vault

Completed

Link: vault-x.xyz | Repo: [jayesh-thar/vault-x](https://github.com/jayesh-thar/vault-x)

- Engineered a zero-knowledge identity vault with client-side AES-256-GCM encryption and Argon2id key derivation — server never stores or accesses plaintext data.
- Built a custom React frontend delivering secure autofill, password health analysis, and session-based access control for end-to-end vault UX.

Authentication API – Secure, reusable auth service

Completed

Repo: github.com/jayesh-thar/auth-api

- Built a reusable authentication service with JWT access tokens, httpOnly refresh token rotation, and bcrypt password hashing for secure multi-user access.
- Implemented rate-limited endpoints, role-based access control, and input validation middleware with zero hardcoded secrets.

HookBin – Webhook inspection, debugging, and replay platform

In Progress

- Developing a Node.js/Express backend to receive, log, and replay incoming webhook payloads for real-time request inspection.
- Building a live-streaming frontend with searchable request history and one-click replay for fast webhook debugging.

KEY SKILLS

Tech Stack: MERN | PERN

Frontend: React.js | Next.js | Redux/Context API* | Tailwind CSS | HTML5 | CSS3

Backend: Node.js | Express.js

Databases: MongoDB | PostgreSQL* | Redis*

Languages: JavaScript | TypeScript | Java | C

AI-Assisted Dev: Claude | GitHub Copilot | Cursor | ChatGPT | Gemini Pro

DevOps & Tools: Docker** | CI/CD** | Git/GitHub

Concepts: System Design** | Secure Auth Flows | DB Modelling | RESTful API Design | Webhook Systems* | State Management*

EDUCATION

Bachelor of Technology in Computer Engineering

Marwadi University | 2023–2027

Current CGPA: **8.37** | No Backlog
